Claims 1, 5, 15, and 20-22 have amended in an amendment filed 02/24/2003. Claims 1-5, 7-11, 14-24, 26-30, and 44-47 have been canceled and new claims 48-77 have been added in an amendment filed 04/08/2003. Claims 48, 49, 52-75, and 77 have been canceled and claims 50 and 76 have been amended in an amendment after final rejection filed 06/14/2004. 2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims:

Claim 76 pages 8-9 of amendment CLM(06/18/2004), lines 26-28, delete

“generating an authorization key;

providing the authorization key to the second party;

encoding the authorization key with at least one of a plurality of criteria;”

Allowable Subject Matter

3. Claims 50, 51, and 76 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Claims 50 and 51 are drawn to a method for disbursing a first party's personal information to a second party. The closest prior art, Fortenberry et al., U.S. Patent No. 6,005,939 A, discloses a similar method. Although Fortenberry et al. describe obtaining a second party identifier (see column 8, lines 42-47; figure 5, process block 510; vendor requests: RELEASE-TYPE TO INTERNET-SITE ON BEHALF OF MY-USER-ID), they neither teach nor suggest recording the second party identifier if the second party is not authorized to receive the information, nor rejecting the second party's request for information. These limitations explicitly incorporated in independent claim 50 render claims 50 and 51 allowable.

Claim 76 is drawn to a method for disbursing a first party's personal information to a second party. The closest prior art, Fortenberry et al., U.S. Patent No. 6,005,939 A, discloses a similar method. Although Fortenberry et al. describe encoding the authorization key with at least one of a plurality of criteria (see column 8, lines 1-7; security keys for each item at different

security levels are delivered to the passport requestor; see column 6, lines 30-36; figure 2B, item 210; web site receives keys from user in transmission packet; see column 9, lines 8-10; where the public keys are encrypted using double keying encryption technology), they neither show nor motivate the at least one of a plurality of criteria includes a criterion to indicate the number of times the authorization key can be use by the second party to obtain access. This limitation explicitly incorporated into independent claim 76 renders it allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
